

Asthma pockettool is a collection of the latest classifications and recommendations for the management of asthma and COPD in a sleek, highly portable format. The features of this new product include:

- Information on etiology and clinical findings in asthma and COPD.
- Description of diagnostic tests and criteria, and expected pulmonary function test (PFT) findings.
- Classification systems and stage/grade specific treatment protocols including precise dosing information for both asthma and COPD.
- Review of pulmonary function testing parameters, relevant terminology.
- Ultra-compact size, 3 1/4" x 2 1/4" x 1/4".
- Sturdy, laminated paper construction designed to endure heavy use.
- Fully indexed for rapid access.

For physicians, residents, nurses and all other healthcare professionals.
